

Api to Add customer data to add reward points

POST : <http://localhost:8082/api/rewards/transaction>

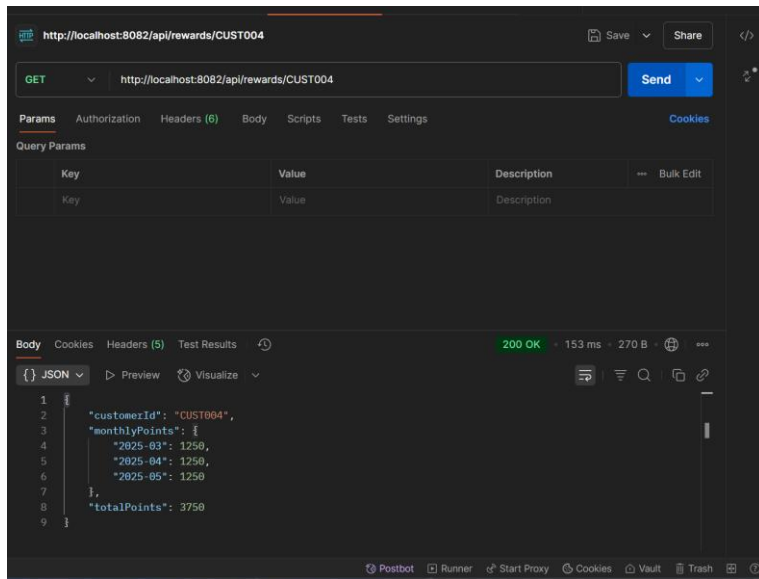

It Adds only data with in current date range if out of range means future date it will the error

***Once I want to get data calculated reward point are only 3 consecutive months other than that it will be skipped

API:

GET: <http://localhost:8082/api/rewards/CUST004>

****Previously I added 5 months data it returns only three month data reward points calculated**

*****Also developed one more api to check all transactions made:**

Api:

GET: <http://localhost:8082/api/rewards/transactions>
